

unit-1

Introduction to CH: Differences between C and CH, Disadvantages of Conventional Programming, Evolution of CH, Key Concepts of Object Oriented Programming, Structure

of C++ program , Advantages of OOP, scope resolution Operator, Namespace

unit-2

Classes and Objects: Declaring Objects- Access Specifiers and their Scope, Defining Member Function, Rules for Inline Functions, static Member Variable, static Member Function, Friend functions, overloading Member Function, Array of Objects, Object as Parameter, Object as return type, Nested class. Introduction to Constructors and Destructor, Characteristics of Constructor and Destructor, Application with Constructor, Constructor with Arguments, Copy Constructor, Destructors, Anonymous Objects.

unit-3

Operator Overloading: Introduction, The Keyword Operator, Rules for Overloading Unary Operator, Overloading Binary Operator, Overloading using friend function.

Inheritance: Introduction, Reusability, Types of Inheritance, Virtual Base Classes, Object as

a Class Member, Abstract Classes, Advantages and Disadvantages of Inheritance. Pointer to

Class- Pointer Object, this Pointer, Pointer to Derived Classes and Base Class.

Binding Polymorphisms and Virtual Functions: Introduction, Binding in C++, Virtual Functions, Rules for Virtual Function, Abstract classes, Virtual Destructor

unit-4

Generic programming with Templates: Introduction, Need for Templates, Definition of class Templates, Normal Function Templates, Overloading of Template Function, Bubble

Sort Using Function Templates, Difference between Templates and Macros, Linked list with

templates

unit-5

Exception Handling: Introduction, Principles of Exception Handling, The Keywords try throw and catch, Multiple Catch Statements.

Files: Stream I/O, Reading and writing to Files.

Overview of Standard Template Library: Introduction, STL Programming Model, Containers,

Sequence Containers, Associative Containers, Algorithms, Iterators, Vectors, Lists, Maps
